Dear friends!

Welcome to the pages of the first issue of our Journal in 2021! I sincerely congratulate all of the Nauryz holiday – the spring equinox, the renewal, and awakening of nature! I wish you health, creative ideas, and the achievement of new goals!

We are delighted with the scientific and educational achievements, promising ideas, and plans. On February 05, 2021, the Lancet Oncology Journal published an article called “Comparison of breast cancer and cervical cancer stage distributions in ten newly independent states of the former Soviet Union: a population-based study.” A multination group of authors has processed the results of cancer stage distributions in post-Soviet countries compared to the leading countries of the world.

As part of the World Cancer Day, the Kazakh Institute of Oncology and Radiology and oncological centers of the country held Doors Open Days attended by the leading specialist in surgical oncology, breast cancer, oncogynecology, oncourology, oncodermatology, pulmonology, and ENT doctors.

The VI Republican Conference “Palliative Care: Global Agenda and Kazakhstan Realities” held in February involved a wide range of healthcare and social welfare workers and representatives of the non-governmental sector from the regions of Kazakhstan.

Online seminars, master classes with the participation of international experts were held for narrow specialists of regional outpatient clinics. They covered the topics of “Human Papilloma Virus and Cervical Cancer at PHC level,” “Radiation Diagnostics of Lung Cancer,” “Radiation Therapy in the Era of the COVID-19 Pandemic: Current Trends”.

We will appreciate it if you share your scientific and clinical achievements in our future issues!

Take care of yourself and stay healthy!

Best regards,

Diliara Kaidarova,
Chairman of the Board, KazIOR
